Country: India

Participated As: Artist Duo

Proposed subject: Memory is always in the periphery

"Memory is always in the periphery" is part of an ongoing collaborative VR project led by Aditi Kulkarni and Payal Arya. The photogrammetry film illustrates a simulation of a moment in time by capturing isolated spaces and tapping into the potential of 3D scanning technologies to mimic our reality. An experimental mixed reality interactive art piece where the technology mediates self-perception. The video also opens up a discussion on the fungibility and selectivity of memory. Isolation got new meaning because of the pandemic, they seek the collective memory of this personal, intimate moment in history. Through opening up these spaces, the visitor enters and trespasses the private spaces, which were closed off.
